# GREEN LEADERSHIP

\* According to the US Environmental Protection Agency, the majority of U.S. car trips are between one and five miles

**Segway Inc. has been providing personal mobility solutions since 2001 and is the market leader in alternative transportation**

**When replacing short car journeys\*, the Segway PT helps reduce CO<sub>2</sub> emissions:**

- 93% reduction in “well to wheel” CO<sub>2</sub> emissions per mile vs. the average US passenger car
- Zero emissions during operation – ideal for large indoor facilities

**and reduces energy consumption:**

- 11 times more energy efficient than the average automobile
- Consumes about one kWh per charge, less than one cent per mile of travel

# DURABLE & RELIABLE

- Segway understands the intense demands of Patrolling and puts all of its products through rigorous testing that includes:

- Severe Heat and Cold
- Humidity
- Salt
- Rain
- Dust
- System Integrity (simulated use)

- **Environmental testing:**

**Severe Cold**

**Solar**

**Salt Spray**

**Intense Heat**
